

# Oral Presentation

No.	Title of the Presentation	Author(s)	Page
O-01	Hyaluronic Acid Hydrogel with Gradient Mechanical Properties for Tissue Engineering	Mina Kwon	1
O-02	Upconverting Hyaluronate based Nanoparticles for Transdermal Delivery	Hye Eun Choi	2
O-03	Performance of asymmetric supercapacitors prepared by flower like NiCo <sub>2</sub> O <sub>4</sub> @CoFe-layered double hydroxide compounds and activated carbons	Meiying Cui	3
O-04	Selective enrichment of CO <sub>2</sub> electrotrophs for biogas-upgrading of CH <sub>4</sub> by intermittent applied potential-induced microbial electrosynthesis cell	Minsoo Kim	4
O-05	Electro-deposited polyaniline on graphite felt (PANI/GF) improves start-up time and acetate productivity of microbial electrosynthesis cell	Eunseo Kim	5
O-06	Machine Learning for Optimizing Thermal Conductivity of Thermal Interface Materials	Chaeseong Na	6
O-07	Room Temperature Repairable Solid Covalent Adaptable Network with UV Responsive Disulfide Bonds	Yeomyung Yoon	7
O-08	High-Yield-Stress Particle-Stabilized Emulsion for Form-Factor-Free Thermal Pastes with High Thermal Conductivity, Stability, and Recyclability	Yongsu Jo	8
O-09	Styrenic Block Copolymer-Based Pressure-Sensitive Adhesives without Volatile Compounds using Organic Eutectic Liquid	Gyeong Hwan Choi	9
O-10	Efficient UV Absorbing and Anti-Reflective PDMS Film for Improving Stability of Perovskite and Organic Solar Cells	Hanbin Lee	10
O-11	Dual-functional electrochromic supercapacitor devices with electrospun TiO <sub>2</sub> Ion Storage Layer	Pal Raksha	11
O-12	Multifunctional polymer electrolyte for flexible electrochromic devices	Sun Fayong	12
O-13	Synthesis and characterization of spirocyclic mid-block contained triblock copolymer	Suraj Kishan Aswale	13

O-14	<b>Fabrication of Polyamide 6-based CFRTP with Water Resistance via T-RTM Process and Fluorinated Polydopamine Coating</b>	Seung Mo Son	14
O-15	<b>3D printing of Spiropyran-incorporated Liquid Crystal Elastomers for Programmable Mechanochromic Responses</b>	Kyeong-wan Kim	15
O-16	<b>Poly (acrylic acid)-Derived Semi-IPN Binder for Silicon Anode in Lithium-Ion Batteries</b>	Seungjae Lee	16
O-17	<b>Enhancement of Astaxanthin Biosynthesis in <i>Haematococcus lacustris</i> using Electrochemical &amp; Phytohormone Treatment</b>	Sathiyavahisan Laxmi Priya	17
O-18	<b>Structural Transformation of Pyrolyzed Quinacridones and their utilization as Anodes in Sodium-ion Batteries</b>	Seongwook Chae	18
O-19	<b>A novel process-level carbon contribution analysis (PCCA) method for carbon minimization of chemical processes: Exergy mapping to carbon emissions</b>	Wonjun Noh	19
O-20	<b>To enhance the sustainability Liquefied Hydrogen Supply Chain: The optimal design for cold energy recovery</b>	Haneul Mun	20
O-21	<b>Cost optimization of CO2 capture process Based on the Carbon-Techno-Economic Analysis Model</b>	Sihwan Park	21
O-22	<b>Bayesian optimization of wet-impregnated Co-Mo/Al<sub>2</sub>O<sub>3</sub> catalyst for maximizing the yield of carbon nanotube synthesis</b>	Sangsoo Shin	22
O-23	<b>Wet spinning of multi-walled carbon nanotube fibers via surfactant system</b>	Jaegyun Im	23
O-24	<b>End-functionalized SBR for Tire Tread of Electric Vehicle</b>	Sanghoon Song	24
O-25	<b>Quantitative Defect Characterization Based on Nitrogen Adsorption Isotherms of UiO-66 with Machine Learning Approach</b>	Yu Chen	25
O-26	<b>Hydrothermal synthesis of SnO<sub>2</sub>-rGO composite using tea extract: investigation on photocatalytic dye degradation</b>	Hariventhan Ragupathi	25
O-27	<b>Gelation Behavior of Cellulose Nanocrystal Suspensions Containing Neutral and Ionic Polymers by Non-linear Rheological Properties</b>	Siyeon Kim	25
O-28	<b>Effect of Several Inorganic Fillers on Rheological Properties and Morphology of Polylactic Acid (PLA)/Low-density Polyethylene (LDPE) Blends</b>	Min Chan Kim	26
